Volume 10, no. 6, e02384-19, 2019, https://doi.org/10.1128/mBio.02384-19. On PDF page 1, in the abstract, in the sentence “Four high-risk international CNPA clones (ST235, ST823, ST375, and ST446) dominated, but the distribution of these clones changed significantly after the intervention was implemented,” “ST375” within the parentheses should be “ST357.” This change does not change the conclusions of the paper.
