**Figure S1. Comparisons of the GroEL sequences from *E. coli* and the *ESKAPE* pathogens.** The respective panels show GroEL sequence comparisons between *E. coli* 4pko.1.B with: **(EF)** *E. faecium*; **(SA)** *S. aureus*; **(KP)** *K. pneumoniae*; **(AB)** *A. baumannii*; **(PA)** *P. aeruginosa*; **(EC)** *E. cloacae*. Identical residues are shown in green, similar residues are shown in purple, and different residues are shown in red.
