Figure S1

A. Log10 total iBAQ vs. log10 protein level in UPS2 spike-in.

B. Counts of MS detected (2,182) and not detected (614) vs. log10 total iBAQ.

C. Raw MS intensities for RplB and human albumin.

D. Log10 sum of RNA reads in gradient vs. log10 RNA level in ERCC spike-in.

E. Counts of RNA-seq detected (8,297) and not detected (2,971) vs. log10 reference reads.

F. Raw RNA seq reads for RplB and human albumin, corrected and norm. to max.
