3 **Fig. S3.** Time course analysis of *P. aeruginosa* respiratory tract infection. Mice
 4 (n>4 per group) were infected intranasally with 2x10⁷ cfu of PAO1 or PAO1ΔeftM
 5 and euthanized at different times to determine the bacterial load in the nasal wash
 6 and in the lung. Errors bars represents SEMs. Statistical analyses were done with
 7 Student's unpaired two-tailed *t* test; * *P* < 0.05, ****P* < 0.001.
