

FIG S1. LEE gene expression in *C. rodentium*. (A) qRT-PCR of *ler*, *nleA*, *escV* and *tir* in WT, $\Delta qseC$ and $\Delta qseE$ in DMEM OD₆₀₀ 0.7 at 37°C. (B) Western blot of EspB, from secreted proteins of WT $\Delta qseC$ and $\Delta qseE$ *C. rodentium*. BSA is a loading control. (C) qRT-PCR of *ler* and *escV* in WT, $\Delta qseC$ and $\Delta qseE$ and the complemented mutants (comp) in DMEM OD₆₀₀ 0.7 at 37°C. *** $P < 0.001$; ** $p < 0.01$
